## REDEVELOPMENT

Pennsauken Township has an aggressive economic development and housing program. The Township Committee recognizes that our superior quality of life in Pennsauken is the result of a healthy economy, a stable housing market and special attention to the redevelopment of the areas of the community.

Redevelopment is a process where we study areas of the Township where it appears that conditions exist (i.e., vacant or underutilized properties) and determine if the government action that could help spur the revitalization of the properties. The Philadelphia Flyers Skat Center is a good example of a successful redevelopment project. The results include everything from aesthetic improvements to new business development, increased services to residents and public facilities.

Three areas of the Township have been targeted for redevelopment:

- Delaware River Waterfront
- Crossroads (Intersection of Routes 130 and 73)
- Route 130

### DELAWARE RIVER WATERFRONT

Across the country officials are rediscovering the hidden treasures of urban waterfronts. Here in Pennsauken we have targeted our riverfront as a redevelopment area. The area stretches from Camden boarder at 36th Street north to Palmyra. River Road, which runs parallel to the river as the eastern boarder. The area is almost exclusively industrial with our major sites comprising the bulk of the property: (1) Petty's Island, (2) the Texaco site, (3) the undeveloped portion of A Hess, and (4) the Vineland Construction site. There are several small properties that comprise the area, but these properties form the backbone of the redevelopment area. The majority of them are inactive and no longer used for their original purpose. The Township has received a \$200,000 federal grant to investigate the area's environmental conditions as well as a \$50,000 economic development grant from the Camden County Freeholders to help fund a market feasibility study. A formal redevelopment study is underway. As the project unfolds, the Township will conduct a number of public meetings to provide residents with conceptual plans. Access to the waterfront in Pennsauken residents is a high priority for Township Committee.

### CROSSROADS (INTERSECTION OF RT. 130 & RT. 73)

The area surrounding the intersection of Routes 73 and 130 is the subject of a redevelopment study currently underway. The area borders the Route 130 corridor in Burlington County which is the subject of a targeted economic development project undertaken by Burlington County. The study will examine how Pennsauken can build on the work in Burlington. It will examine the area bordering Route 73 between Route 130 and the Delaware River, as well as the area between Route 130 and Haddonfield Road. The study will examine property conditions, traffic circulation and potential redevelopment uses. As a gateway into New Jersey and Camden County, the study will measure the potential for more attractive and productive commercial uses. The study is being funded through an economic development grant from the Camden County Board of Freeholders.

### ROUTE 130

With redevelopment projects to the north in Burlington County, and south at Admiral Wilson Boulevard, it is appropriate that Pennsauken's stretch of Route 130 be examined for redevelopment potential and aesthetic improvements. The Township has applied for a State Smart Growth fund such a study. As is the case with the Crossroads project, the Route 130 study and plan will be coordinated with efforts in Burlington County.

### District Profile

Pennsauken is an urban, middle class community of approximately **35,000** people in Camden County. Its **10.5** square miles are home to people of a broad range of ethnic backgrounds. The schools in turn are a reflection of the community and a microcosm of society in today's world.

The Pennsauken School District provides for the education of approximately 6000 students in grades prekindergarten through **12**. Enrollment figures are currently on the increase following a period of decline. The physical make-up of the district consists of a four-year high school, a middle school, eight elementary schools, one pre-school and one alternative school located strategically throughout the Township.

 In the elementary schools, students receive instruction in the basic subjects such as, language arts, mathematics, science and social studies with specialized instruction in art, music, health, safety, offerings include remedial reading, remedial mathematics and programs for the gifted/talented as well as special education. State of the art science labs were introduced during the **1993-94** school year to prepare our students for the technological advances of the 21st century.

 A magnet school, grades K-5, was established in 1984 as part of the district's desegregation plan. The magnet school, recognized as one of the finest in the state, boasts an extended school day, an enriched curriculum, and a full day kindergarten program and is available to eligible students selected by lottery. The magnet school allows its students to express themselves through an

In addition, the district employs three student assistance counselors to address those social problems prevalent in today's society such as substance abuse, alcoholism, etc.

 Recently, the district underwent a rigorous evaluation by the New Jersey Department of Education and received a full seven-year certification. This reinforces our belief that the Pennsauken School District is offering the most effective programs/services to meet the needs of its children.

 We in the Pennsauken School District are proud of our schools and the accomplishments of our students. Much of the success the district has experienced can be attributed to a number of factors; the efforts of an experienced and dedicated staff, conscientious leadership, a board of education supportive of programs to improve

extensive variety of performing and visual arts programs.

 **For the middle years**, the Howard Phiher **Middle** is an impressive institution. The middle school is a single story, tri-wing structure, which operates under the "school within a school" concept. Under this plan, each grade level has its own wing and designated administrator. Students in the middle school study a basic range of courses, including science, math, language arts, social studies computer technology, and for our special needs students, special education.

 In addition to its regular curriculum, the middle school offers a wide range of electives, clubs, and extracurricular activities, including a full schedule of inter and intrascholastic athletic programs, all of which contribute to the growth of the "total child".

 **Pennsauken High School** is a modern facility located on an expansive site surrounded by an athletic complex second to none. The high school provides a comprehensive curriculum, which includes a diversified, yet flexible program of studies and activities to help students develop into effective, responsible members of society. Pennsauken High School offers students over **220** courses to help prepare for careers or higher education. Selected courses are offered in conjunction with local colleges, and summer and after school programs combined with some creative scheduling enables students to expand their course offerings.

 A full, comprehensive college preparatory program is offered with advanced placement courses in chemistry, physics, biology, anatomy, physiology, English, social studies and foreign language. College preparatory mathematics courses range from algebra to

education and an active PTA/community who get involved with schools. Through this cooperative effort, the Pennsauken Public Schools are a proud part of Pennsauken's past, positive force in the present, and an inspiration for the future.
